

Hypothesis Development Outline

Use the following space to write down your hypotheses to the question, "How did the Native Americans arrive in the Pacific Northwest?" After each data set is presented you will have a chance to change your hypothesis.

Initial Hypothesis

One reason I chose the Land Bridge as "How the Native Americans came to the Pacific Northwest?" was just what I've heard in previous studies when I have studied this subject. It also seems like a rational explanation. The second reason is that of the Land Bridge theory supporting it.

Revised Hypothesis after the second data set

Revised Hypothesis after the third data set

Final Hypothesis (Conclusion)

On the back of this handout give two reasons you chose your final hypothesis. Be sure you write your response in complete sentences.
